

Ontario Johne's Disease Program For Beef Cow-calf Herds.

This Testing Submission Form **MUST** accompany blood samples for the Johne's Program to the AHL, Guelph, Ontario. Thank you.

Program Outline:

1. Collect a blood sample from each mature (2 years and older) cow and bull and fill out the Herd Information form, giving information on animals to be tested.
2. Submit blood samples, this Testing Submission form and the Herd Information forms to the AHL via the herd veterinarian.
3. When test results are returned, do a "Risk Assessment" (RAMP) using the Beef Cow-calf Risk Assessment" form for guidance (producer and veterinarian together).
4. When all project activities are complete, veterinarians will submit the information to ***Ann Godkin, OMAFRA Elora by FAX 519-846-8178.***
5. When all completed project information is received, reimbursement for testing will be sent.

Producer Agreement

I agree to allow my submitted program samples, Johne's test results and herd information to be released to the Ontario Johne's Program (the Beef Cow-Calf Herd project), for the purposes of test reimbursement, inclusion in an aggregated database with herd identifiers removed and related research projects. I understand that individual producer information will be kept strictly confidential and will be used solely for the purposes of this program.
